### Profile

---

Motivated and detail-oriented student with a strong foundation in computing, mathematics, and problem-solving. Experienced in developing web-based applications using modern technologies, with a keen interest in software development and emerging technologies. Actively participated in academic competitions, enhancing analytical thinking and coding skills. Committed to continuous learning and applying technical knowledge to build efficient, user-friendly solutions.

### Education

---

**Software Engineering, Addis Ababa University** 12/2023 – 06/2028  
Course completed: web and app development, Data structure and algorithm, Addis Ababa,Ethiopia  
Object oriented programming, Database

### Professional Experience

---

**Frontend development, 5 kilo Gibi Gubae** 07/2025 – 09/2025  
Developed responsive websites using HTML,CSS and Javascript and Gained Addis Ababa, Ethiopia  
hands-on experience in version control(Git) and agile workflows.

### Projects

---

#### Student Attendance Management System

Developed a web-based application to efficiently track and manage student attendance across courses.

- Implemented core features for recording, monitoring, and generating detailed attendance reports for each class.
- Enhanced the overall attendance process, improving accuracy, organization, and time efficiency for both students and instructors.
- Built a responsive and user-friendly interface using HTML, CSS, and JavaScript (*replace with your actual technologies if different*).
- Collaborated with a team of 5 members, contributing to system design, development, and project coordination.

#### Lost ID Management System (Web Application)

- Designed and developed a web application to streamline the management of lost, found, and new ID requests.
- Implemented functionalities for reporting lost IDs, registering found IDs, and processing new ID applications efficiently.
- Focused on usability by creating a clean, responsive interface using HTML, CSS, and JavaScript (*replace if needed*).
- Worked collaboratively in a 5-member team, demonstrating strong teamwork and project planning skills.

#### Additional Projects

- **GitHub Profile Viewer** – Built a web app that fetches and displays user profile data dynamically from GitHub.
- **Random Quote Generator** – Developed an interactive application that generates quotes along with their authors.
- **Weather Finder** – Created a web app that retrieves and displays real-time weather data for any city.

## Skills

---

### Data structure and Algorithm

problem solving (300+leetcode)

### Software Development

Java,Python,Javascript

### Database

PostgreSQL

### Tools and Technologies

Git,HTML,CSS,React.js

## Certificates

---

### Udemy Academy

Data structure and Algorithm

### Solo learn Academy

Python,C++,Java,

### Udacity

Fundamentals of Web  
development
